

ANNUAL BANQUET
OF TENNIS CLUB

The fourth annual banquet of the Carbon Lawn Tennis Club was held at the Carbon hotel on Tuesday, November 10th. Fifty-three members and visitors were present including Messrs. F. Moyer, Drumheller; J. Taylor, Acme. S. Tortance, R.J. Fairbairn, C. H. Nash, F. Worsley, E. Sellens, W. Edwards, H. MacDonald, H. Willson, Len Poxon, J.M. MacDonald, C. Dunsmore, Hugh Brown, J. Connolly, I. Guttman, Geo. Malton, V. Hawkins, C.R. Nash, F.J. Bessant, H. Jealous, Rev. Batchelor, P. Edwards, B. Ramsay, J. Spence, H. Edwards, D. Fox, W.A. Braisher, N. Nash, R. Wise, S. Poxon, H. Wise, G. Jealous, and F. Poxon. Mesdames Fox, Torrance, Dunsmore, Brown, Willson, Evans, R. Nash, Malton, Bessant, C. Nash and L. Poxon. Misses K. Watkins, E. Young, D. Nash, A. Lacombe, I. Nash, W. Poxon, A. Wise and M. Ramsay.

The catering of the hotel proprietor, P. Edwards, was exceptionally good, and was greatly appreciated by all present.

After the banquet the following toasts were given: "The King" proposed by J.M. MacDonald, followed by the singing of "God Save the King." "The Ladies" proposed by W.A. Braisher, responded to by Mrs. Fox. "The Visitors" proposed by H. MacDonald, responded to by J. Taylor of the Acme Tennis Club. "The Club" proposed by R.J. Fairbairn and responded to by H. C. Willson, President of the Carbon Lawn Tennis Club. "The Game" proposed by Rev. Batchelor, responded to by J. Connolly.

Following the toasts Mr. F. Moyer, M.L.A. of Drumheller, gave an interesting address on "Sport" which was well received and greatly appreciated.

Between the toasts the following items were given: Song, by Mrs. Evans, Reading, by Mrs. Malton; Song, by Mrs. Torrance. Community singing led by Len Poxon, was also indulged in, the accompanists being Miss K. Watkins and R.J. Fairbairn.

A very interesting and enjoyable evening was brought to a close with the singing of the National Anthem.

ELEVEN YEARS AGO

Taken from the files of the Carbon News eleven years ago this month.

The Alberta Pacific has started the building of the first grain elevator in town. W. Leitch has the contract for hauling the gravel for the foundation of the new structure.

Mr. L. D. Elliott, old-timer of Carbon, died on Thursday night, Nov. 20, at the Sunnyslope hospital, Calgary. He leaves 2 sons, W. B. Elliott and L. C. Elliott.

A special meeting has been called to appoint officers of the U.G.G. Local so that the erection of the elevator may be started at once.

A dance is to be held in the Farmers Exchange hall on Thursday, Dec. 2nd. Admission \$1.75 per couple.

Mr. J. J. Greenan received word on Tuesday of the death of his mother, who has resided at Lindsay, Ont.

WILLIAM OLIVE GETS ONE-YEAR
TERM FOR ROBBERY ATTEMPT

The case of William Olive for attempting to break into the Government Liquor Store at Drumheller, which was held over from last March, was heard in police court at Drumheller on Tuesday morning of this week. The jury, after one hour's deliberation, declared the accused guilty and the Judge sentenced him to one year in jail for attempting to break into the Vendors. Two other charges, one for attempting to bribe a police officer, and the other for carrying burglar tools, were withdrawn.

Annual Meeting of
Curling Club

The annual meeting of the Carbon Curling Club was held in the Municipal office on Tuesday evening, November 17th, with President A. H. Jealous in the chair. The minutes of the previous meeting were read and adopted and the financial report of the club was given, showing a small balance in the bank, with numerous outstanding accounts to be paid.

Discussion took place on alterations to the interior of the rink. Rev. Wm. McNichol pointing out that it would be of great advantage to the curlers to have the walk at the side moved to the centre of the rink and have the door going on to the ice moved to the centre of the building. These alterations are to be made by volunteer labor and members are going ahead with them at the present time. It was also decided to have barrels of soft water on hand during the winter for flooding purposes.

An ice committee, to look after the making of the ice and other matters, was appointed, this committee being composed of Messrs. J. Flaws, Sandy Reid, M. Skerry, F. Bessant, A. H. Jealous, and S.J. Garrett. This committee has reported that the making of ice will be commenced immediately and it should not be long before the curling season is under way, providing the weather remains cold.

At this meeting it was decided to put on a dance in the very near future. Funds must be raised in some manner besides the dues, and it was thought that this would be the best means of doing so at the present time. A committee of Messrs. Greenan, Torrance, Fairbairn, Edwards and L. Poxon, was appointed and given full power to act on this affair.

The following officers were elected for the coming year. President, A. F. McKibbin. Vice-President, F. J. Bessant. Sec.-Treas., R.J. Fairbairn. Chaplain, Rev. Wm. McNichol. Executive Committee—Messrs. A. H. Jealous, S.J. Garrett, Jas. Flaws, L. Poxon and P. Edwards.

The question of fees was fully discussed and owing to the very poor financial condition of the club and the past indebtedness, it was decided that curling could not be had this year under a fee of \$10 and a motion passed authorizing the fee to be set at this amount. Student fees were set at half that of the men's fees, or \$5 for the season. The Secretary pointed out at this time that no curler would be allowed on the ice until he had paid his dues, with no exception.

Everything points to a good curling

ALBERTA NEWS

Some petty thieving has been going on in Bassano during the past few weeks. Cars standing outside at night have been emptied of gasoline and tools have been stolen from private garages.—Bassano Mail.

Hunters are getting their quota of deer and moose in the country to the west of Red Deer. The game seems to be plentiful and despite the lack of snow, most parties have been able to secure a head or two on their trips into the bush.

Last week the skating rink in the town of Gleichen was regraded and opening operations have been commenced. Last year at this time there was skating at this southern town.

Up to the end of September 17,927 radio licenses have been issued in this province against 24,493 issued during the fiscal year of 1930-31.

At the stock sale held recently at the E P Ranch 32 Shorthorn cattle and five Percheron mares were sold. The highest price was \$245 for Princeton Hanna, a 4-year old prize winning red cow bought by E. J. Boake of Acme.

Alderman D.K. Knott, Labor, was elected mayor of Edmonton by a large majority at the civic elections held at that city last Wednesday.

Deliveries of grain at the Three Hills elevators have been rather heavy lately. Probably about half the crop has been brought in—around 250,000 bushels to date. It was estimated by local grain men that about 400,000 bushels would cover the yield of the district this year.—Three Hills Capital.

A third refinery is being added to the plants serving the Alberta oil industry by Floyd Huff, formerly general manager of Regal Oil and Refining Company, and his associates, who include A. G. Spooner, pioneer oil man of Alberta. The new refinery is located in Manchester, Calgary and is now completed. It will be operated by Bell Refining Company Ltd., a company capitalized at \$100,000, owned and controlled by Alberta men. The plant will have an initial capacity of 1000 barrels a day with provision for additional capacity.

With about \$11,500 of the \$15,000 appropriation for unemployment relief spent, the city of Red Deer decided to stop relief measures for a while.

THE BUDGET

(Issued by The Alberta Wheat Pool)

Alberta probably created a new record in creamery butter production this year, according to Dr. C.P. Marker, dairy commissioner. He estimates that production will exceed the peak of 23,339,000 lbs. manufactured in 1924. To date the output is 32 per cent ahead of last year.

Australian Wheat Estimate

Pre-season estimates indicate this coming season's wheat yield in Australia to be 180,000,000 compared with 212,628,669 bushels last year.

Pool Renews Lease on Terminal

Lease of the Victoria grain elevator for a one-year period to the Alberta Wheat Pool was approved by the Victoria City Council November 2nd. The Wheat Pool leased the elevator last year for a similar period from the Panama-Pacific grain terminals and negotiations recently conducted resulted in another term.

The dance held in the Elks hall last Friday night under the auspices of the Carbon Elks, proved a success and about \$24 was cleared on the undertaking.

season. Freeze-up has been early and curling should start at least a month earlier than last year.

WINTER IS HERE—19 BELOW
ON TUESDAY NIGHT

Winter is here with all its pomp and glory—snow and zero weather. Last Friday night it commenced to snow and the weather turned cold and has remained so ever since. Saturday night it was reported to be 12 below zero and since that time we have experienced a cold spell. If the weather continues it should not be long before enthusiasts can indulge in their favorite winter sports, curling, skating and hockey.

A later report was that on Tuesday night the thermometer registered 19 below zero. Cold, eh?

Fatal Accident on
Highway

Peter Brown, a well known resident of Drumheller, was fatally injured at about 11.30 on Monday night when crushed underneath a Hudson eight sedan in which he was riding, driven by George Nichols Jr., of Western Gem, when a collision occurred between the Hudson car and a Buick sedan driven by Peter Krill, of Bellevue, about ten miles east of Belseker. James Stenhouse, steward of the Canadian Legion club sustained scalp wounds and severe shock. Seven other people escaped injury. The Hudson car was badly damaged while the Buick escaped with slight damage to the front wheels.

According to information obtained by Constables M. Moriarty of Carbon and J. Radcliffe, of Drumheller detachment A.P.P., the Hudson car was proceeding to Drumheller when it collided with Krill's car which was being driven to Calgary. Evidence points to the fact that Brown was attempting to step out of the car following the collision when he vehicle overturned, pinning him beneath and crushing his chest.

Dr. McFarlane of Carbon, was called to the scene of the accident and after giving emergency treatment ordered Brown and Stenhouse to be rushed to Drumheller hospital, but when the car was nearing the city, Brown expired. Responsibility of the accident has not yet been placed.—Drumheller Mail.

A cable from Buenos Aires indicates that the new Argentine wheat crop may total 228,000,000 bushels compared with the final official estimate last year of 239,000,000 bushels. Wheat acreage in Argentina is down but so far weather conditions have been almost ideal. Harvesting takes place in December.

BLACK DIAMOND
COAL TO OTTAWA

On Friday, November 6th, the Black Diamond Mine at Carbon had the honor of being visited by Mr. James J. Richard, assistant chief inspector of mines, Edmonton, and R.G. Campbell, representing the Research Council of Alberta, for the purpose of securing several large samples of Carbon Black Coal, better known in this district as the Black Diamond Coal. These samples, which included small coal dug from the coal face from the floor to roof, for the purpose of a general analysis of the coal, and several larger samples including one piece of coal weighing about 500 pounds. This was sent to Ottawa for the purpose of having a photographic view of the geological structure of the coal. Other samples sent by the representatives of the Research Council included stove coal and egg coal, for the purpose of ascertaining the quantity of the different by-products of the volatile matter of the coal, which is believed to contain a large percentage of motor fuel, coal oil, coal tar, and many other by-products. Mr. Richards stated on his visit through the mine that he was well pleased with the samples secured from the Black Diamond and when asked by the management of the mine, why that coal had been selected, he stated that the Black Diamond Coal was known to be the hardest, cleanest and best in the district and that it was only advisable to send the best coal of every district for general tests.

R. J. FAIRBAIRN,
Secretary-Treas.

It can be seen at a glance that this year's chautauqua was a failure financially owing to the depression which has hit this district particularly hard. In addition to using the balance held in the reserve account it was necessary to call upon the guarantors to make up the deficit. 34 out of 49 guarantors paid \$5. each and the balance of the cash on hand will be re-funded pro-rata.

ANNOUNCEMENT

"SALADA" TEA

'Fresh from the gardens'

A Tick At A Time.

Somebody has told a fanciful story of a salesman who was engaged in an attempt to sell a grandfather clock, telling the prospective purchaser that it would run for one hundred years and be just as good at the end of the period as at the beginning. The clock overhearing this remark began figuring out how many times it would have to tick in that 100 years, and emitted a deep groan, and began to complain "I can't stand it; I can't stand it," whereupon a little cheap alarm clock on an adjoining shelf spoke up: "Cheer up; you don't have to do it all at once. Remember it is just a 'tick at a time, a tick at a time.'"

In these present days as many of us look ahead and see and contemplate the many difficulties to be overcome and the great problems to be solved we are apt to emulate the grandfather clock in its despair and exclaim: "We can't stand it; we can't do it." Looking at the sum total of the things to be faced and to be done, we become discouraged, forgetting that, after all, we are called upon to do only one thing at a time, and that that one thing is not beyond our ability or strength.

Furthermore, in the doing of that one thing immediately confronting us, we develop the ability and build up the strength which enables us to successfully tackle the next thing, and thus we go on from strength to strength, achievement following achievement, whereas nothing but weakness and failure would result from idle contemplation of the many tasks ahead, leading to discouragement which prevented even a start being made.

If at the inception of the project to build the Canadian Pacific Railway, financiers and contractors looking from Montreal towards the Pacific Ocean began to count the number of miles of track that were necessary and the millions of ties to be laid, not to mention the streams to be bridged, the tunnels to be bored, and the mountains to be climbed, they, too, might well have exclaimed: "We can't do it; it is too much." But they had the sense to realize that it was a case of laying down one tie at a time, spiking one rail at a time, and that every tie laid and every rail spiked helped to lay the next tie and spike the next rail. And so the job was done in record time, and the whole history of Canada and the Empire changed for the better.

And so it is with the individual life. Life goes on a "tick at a time." As babies we learn to walk a step at a time, thus preparing for the many millions of steps we will take throughout the years to come. We learn the alphabet a letter at a time in preparation for the multitude of words we later will require to use, and we laboriously recite that "one times one makes two, and two times two makes four," and thus we master the whole world of arithmetic, and in so doing find that nothing is impossible.

And in the philosophy of life it is also well to remember that success and achievement is not confined solely to things material. Too often we regard material reverses and material losses as the "fatal" things of life, forgetting that health, contentment and happiness are the really vital things that matter. And these essential attributes of life are achieved just as material things are gained by, as the little clock said, "a tick at a time."

Grain Samples For Europe

Samples From All Parts Of the West Sent To European Traders

Samples of this year's western Canada grain crop, on which the prices offered by British and European traders will partly be based, have reached Montreal from Winnipeg and will be shipped immediately to most of the British and continental grain exchanges.

The samples were prepared at the office of the chief grain inspector at Winnipeg and are contained in strong close woven bags.

These samples were shipped by the Board Grain Commissioners and are billed to the grain exchanges and grain trade associations in Germany, Holland, Italy, Belgium, France, England, Ireland and Scotland.

The samples, which are made up annually by the western grain standards committee in Winnipeg, contain grain from practically every district in the prairie west and give a fair indication of the quality of wheat which European consumers might expect in the filling of large orders. Specimens of each grade are included, and before shipment is authorized each sample is analyzed and approved by Dr. F. J. Birchard, chief chemist of the Board of Grain Commissioners' Research Laboratory.

Western Wheat Crop

Yield Of 240,970,800 Bushels Estimated For Season Of 1931

A yield of 240,970,800 bushels is the estimated wheat crop of the three western provinces, according to reports compiled by the Northwest Grain Dealers' Association in its annual forecast.

The acreage on which the estimate is based is that compiled by the association early in the season, taking into consideration threshing returns. The figures for wheat are 16,601,050 net acreage, compared with 23,178,000 acres used in the Dominion Government report, which, on September 9, estimated a crop of 246,400,000 bushels.

Asthma No Longer Dreaded. The dread of renewed attacks from asthma has no hold upon those who have learned to rely upon Dr. J. D. Kellogg's Asthma Remedy. So safe do they feel that complete reliance is placed on this true specific with the certainty that it will always do all that its makers claim. If you have not yet learned how safe you are with this preparation at hand get it today and know for yourself.

An Equal Division

In an historical drama an aged king was blessed with two sons. He was pacing up and down the stage, with a weary, troubled look, exclaiming aloud, "On which of these, my sons, shall I bestow my crown?" when there came a voice from the gallery, "Why not 'arf-a-crown apiece, guv'nor?"

Sorry To See Night Coming She Could Not Sleep

Mrs. K. McElroy, Kirkfield, Ont., writes:—"I was very nervous and run down, was short of breath, and had smothering feelings, and was sorry to see night coming as I could not lie down or go to sleep."

I was advised to use Milburn's Heart and Nerve Pills. I took seven boxes and am now completely relieved; can sleep fine all night, and have gained in weight."

Another Growing Industry

Exports Of Canadian Salmon Have More Than Doubled

Canada is replacing the United States in the British market for canned salmon and for the first nine months of the present calendar year, the Dominion more than doubled its exports over the corresponding period a year ago.

Up to the end of September, according to the current issue of the Commercial Intelligence Journal, the United Kingdom imported from Canada 102,000 cwt. of canned salmon, while importations from the United States totalled 96,000 cwt. During the same period last year Canada's share was only 47,000 cwt., while that of the United States was considerably over 100,000 cwt.

Britain imported 262,000 cwt. of canned salmon during 1930.

"THESE HARD TIMES"

"The hard times and scarcity of money makes it more important than ever to economize. One way I save on clothes is by renewing the color of faded or out-of-style dresses, coats, stockings, and underwear. For dyeing, or tinting, I always use Diamond Dyes. They are the most economical ones by far because they never fail to produce results that make you proud. Why, things look better than new when redyed with Diamond Dyes. They never spot, streak, or run. They go on smoothly and evenly, when in the hands of even a ten year old child. Another thing, Diamond Dyes never take the life out of cloth or leave it limp as some dyes do. They deserve to be called 'the world's finest dyes!'"

S.B.G., Quebec.

Scheme May Work

British Have Idea To Keep Indian Tribesmen Quiet

Non-violent methods to keep the tribesmen of North-western India quiet are to be used soon by the British. Instead of bombs, an aeroplane is to be filled with a powerful loud-speaker, from which ordinary tones will emerge immensely magnified. The expectation is that the natives will think it is the voice of their god bidding them not to fight the mighty white man, who could not help killing some of them.

Miller's Worm Powders work so effectively that no traces of worms can be found. The pests pass away in the stools without being perceptible. They make an entire and clean sweep of the intestines, and nothing in the shape of a worm can find lodgement there when these powders are in operation. Nothing could be more thorough or desirable than their action.

Has Served Forty-Five Years

Inspector Cuning Of Royal Canadian Mounties Retires On Pension

With a record of 45 years service in the Royal Canadian Mounted Police and the R.N.W.M.P., Inspector W. A. Cuning, following a six months' leave of absence, will be retired on a pension at the end of that time, it was learned at the Regina headquarters.

Inspector Cuning tendered his resignation in October. He came from Toronto as a boy and joined the then Royal North West Mounted Police in 1885. He was promoted through the non-commissioned ranks until he has reached his present rank which he has held for a number of years. He has been district paymaster and quartermaster. He was also in charge of the weather bureau at Regina.

Inspector Cuning has the distinction of being the only man in the service for such a long period. Mrs. Cuning is also a pioneer, coming to the west from England 49 years ago. Five sons served in the world war. Three of them were wounded and one was a prisoner of war for three years.

The Tourist's Dollar

How the tourist spends a dollar has been analyzed as follows by the U.S. Department of Commerce: transportation 10 per cent.; garage and filling station, 12 per cent.; restaurant, 20 per cent.; hotel or camp, 17 per cent.; retailer, 25 per cent.; theatre and amusements, 10 per cent.; confectionery, 6 per cent.

"If the depression has taught us anything it is that no nation is any longer sufficient to itself alone."

The electric refrigerating industry is about 15 years old.

Says Cancellation Of

Taxes Impossible

Premier Anderson Warns Saskatchewan Residents That Municipal Taxes Cannot Be Wiped Out

"There is no manner whereby taxes can be wiped out or dispensed with," declared Hon. J. T. M. Anderson, Premier of Saskatchewan, in a recent statement in which he warned against the assumption, in some sections of the province, that taxes due rural municipalities would be cancelled. Inability of the municipalities to collect taxes, he said, could only result in the discontinuance or curtailment of essential municipal services, while continuance under government control would virtually mean abolition of local self-government without any release from taxation. The full text of the statement, which is a significant and important one in the present juncture, follows:

"The Government has received many letters having to do with the payment of taxes. Some of our correspondents suggest that there is a feeling abroad in some rural districts that a large percentage of the taxes due to rural municipalities by the ratepayers will be cancelled or wiped out in some manner. It is pointed out that this feeling is having a very bad effect on tax collections.

"A little consideration will show that such a course of action is impossible. There is no manner whereby taxes can be wiped out or dispensed with. The taxes paid by our people to their municipalities are spent on five main items:

1. To assist in maintaining schools.
2. To assist in operating our sanatoria.
3. To pay for municipal telephone debentures.
4. To pay interest and principal payments due on indebtedness owing by municipalities.
5. To pay for municipal hall insurance where same exists.

"Taxes are levied to maintain these services because the ratepayers of each municipality voted in favor of having these services. It is agreed that a considerable number of our rural municipalities are incumbered with debt on account of their expenditures for relief purposes, but it must be remembered that these relief expenditures were exceptional as the times are exceptional.

"If municipalities cannot collect their own taxes because of a disinclination of its residents to pay them, then these services which their own ratepayers voted in favor of having cannot be carried on. It has been suggested that they would still be carried

M-12

on by the Government taking over the administration of same. If this were done, it would mean the abolition of local self-government and would not decrease the taxes of the ratepayers in these rural areas one iota. Money would have to be found to maintain such services, whether found by the rural municipal councils or by the Provincial Government. These monies could come from one source and from one source only, and that is from the pockets of the people and from no other place.

"We are living in serious times. Municipalities find that although their revenues are decreasing their obligations remain the same and, in some instances, have increased. It is too late at the present time to repudiate these obligations by saying that we shall not pay taxes to assist in meeting them. It is too late to say that while we need these services some one else has to pay for them, particularly when we ourselves have voted for these services. If these difficult times have one lesson for us it is that services are not free. They must be paid for. We are now confronted with the unpleasant duty of paying for these services which we must pay for by means of our taxes. There is no other way.

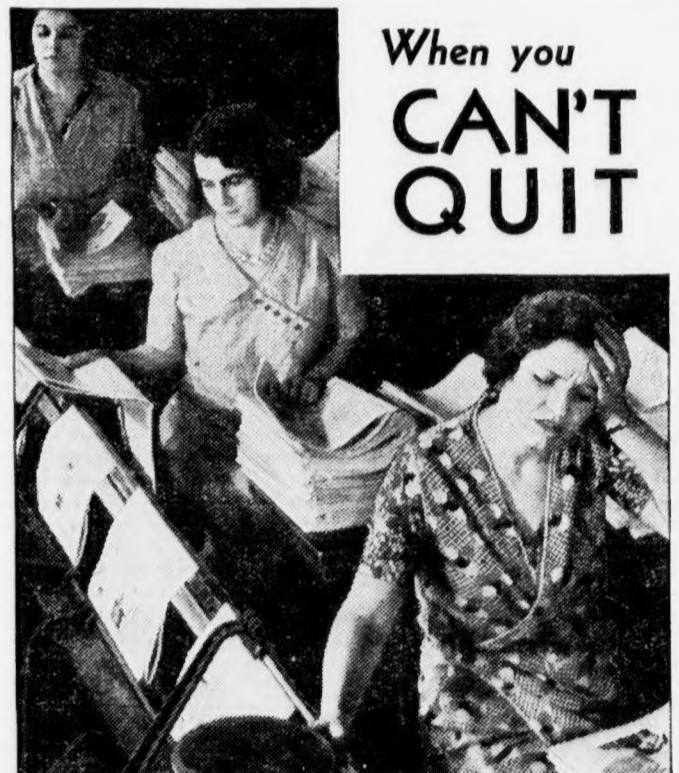

"What is true of taxes is true of other legitimate accounts. When it is within the power of the debtor to make reasonable payments, then reasonable payments should be made."

An Oil That Is Famous.—Though Canada was not the birthplace of Dr. Thomas' Electric Oil, it is the home of that famous compound. From here its good name was spread to Central and South America, the West Indies, Australia and New Zealand. That is far afield enough to attest its excellence, for in all these countries it is on sale and in demand.

Nearly 70 per cent. of Japan farmers cultivate less than two and one-half acres of land per family.

A horse has to be "broke" before it will work. "A lot of people are the same way."

When you
**CAN'T
QUIT**

A HEADACHE is often the sign of fatigue. When temples throb it's time to rest. If you can't stop work, you can stop the pain. Aspirin will do it, every time. Take two or three tablets, a swallow of water, and carry on—in perfect comfort.

Don't work with nerves on edge or try all day to forget some nagging pain that Aspirin will end in a jiffy! Aspirin can do you no harm; just be sure that it is Aspirin with Bayer on each tablet.

In every package you'll find proven directions for headaches,

colds and sore throat; neuralgia, neuritis, etc. Carry these tablets with you, and be prepared. To block a sudden cold on the street-car; quiet a grumbling tooth at the office; relieve a headache in the theatre; spare you a sleepless night when nerves are "jumping."

And no modern girl needs "time out" for the time of month! Your little box of Aspirin tablets is sure relief for all such pain.

Take Aspirin for any ache or pain, and take enough to end it. It can't harm you. At drug stores everywhere. Made in Canada.

Made in Canada

Increase In The World's Wheat Consumption Indicates The Grain Industry Has Promising Future

Strengthening wheat prices and improved demand for that cereal indicate that the international situation is clarifying and the two-year decline in prices is at an end. The uneconomic depths to which wheat sank had the direct result of reducing acreage to the extent of some 14,000,000 acres in Canada, United States, Australia and Argentina, and weather conditions have created a further reduction in production so that it now seems apparent that the world's surplus will be drastically reduced before the end of the crop year.

The world movement of wheat for the present crop year has averaged around 16,250,000 bushels weekly. Thus demand is running higher by a million and a quarter bushels weekly than the early estimates of Mr. Broomhall, well known British wheat authority. The healthy demand is due to low carryovers in importing countries and the comparatively poor quality of the current European crop. Non-European countries have purchased nearly 39,000,000 bushels of wheat so far this crop year, which is 14,000,000 bushels greater than the purchases for the same period last year.

At the present time the attention of millers and traders is centred in the United States' winter wheat area. There is no doubt that the wheat prospect there is not encouraging insofar as large production is concerned. The official estimate of winter wheat seeding will not be available for a month and a half, but private observers predict at least a 16 per cent. reduction in acreage. Last year United States' winter wheat area averaged 19 bushels to the acre, on 40,000,000 acres. Winter killing was comparatively trivial because of the ideal condition of the crop as it went into the winter, and the favorable winter weather. The crop this year will go into the winter season under very poor conditions and greater winter killing may be anticipated.

On the whole, the world wheat picture looks a lot brighter at the present time. Dealers show a confidence which has been absent for the past two years and there is always more inclination to buy on a rising market than in the face of falling prices.

In spite of all that has been said about wheat consumption, late figures released by the Dominion Government show that there has been a decided increase in the world's wheat consumption. In the 10-year period from 1921 to 1931, the annual disappearance of wheat has increased by some 700,000,000 bushels. This would lead to the assumption that the wheat industry still has a promising future and that as the years go by the prairies of Western Canada will be called upon more and more to supply the world's daily bread.—Calgary Herald.

Japan Making Progress

People Seem Determined To Be Up-To-Date

Japan is determined to be "in" all the modern movements, and the latest reports from that land of cherry-blossom show that the young ladies of Nippon have taken up hiking. The Japanese maidens, the Summer School of Oriental Culture at Tokio, was recently informed, "still venerate Mount Fuji, but they are quite capable of climbing it with knapsacks on their backs." Japanese professional men, too, are determined to be in the swim. When representatives of the world's dentists met at Paris recently, they were astonished at the big strides the Japanese had made in dental science.

"If I stay too late at the pub I feel so exhausted the next morning. Don't you?"
"No, but then I'm not married." — Nagels Lustige Welt, Berlin.

W. N. U. 1916

New York and London

Competition Over Population Might Have Better Results In Other Fields

We are rather bored with the periodic argument over whether New York or London is actually the largest city in the world. Even though Dr. Joseph A. Hill, Acting Census Director, now declares that the issue has been settled in our favor and produces two sets of figures to prove this point, we are not greatly impressed. It is an honor in which we are uninterested and except for sympathy for London, nothing would please us better than to discover in the next census figures that New York's population had shrunk to half that of the British capital. If there is to be competition between New York and London, there are other fields in which it might be productive of more significant results. On such matters as homicides, motor accidents, noise abatement, park facilities, municipal cleanliness, traffic regulations, public schools and many other municipal phenomena, not excluding official corruption, a little rivalry between New York and London might be a good thing. It is unfortunate that the one aspect of this city in which we seem to take delight in presenting comparisons with London is our size. Perhaps it is a confession of weakness. — New York Evening Post.

Danger In Stored Fodder

Feed Should Be Thoroughly Dried Before Storing In Barn

Issuing a warning to farmers of the danger of storing green feed and Russian thistle in hay lofts since this gives rise to spontaneous combustion, Hon. J. F. Bryant, K.C., warns Saskatchewan farmers that every care be taken in the storing of such feed.

He said he had received a letter from an adjuster of one of the large mutual insurance companies advising him of a case in the southwestern part of the province where a farmer had put up large quantities of green feed and several loads of Russian thistle on September 12, and on September 30 the barn was burned as a result of spontaneous combustion.

Farmers having this type of feed to store would be well advised to store it outside until it is thoroughly dried before storing it in the hay mow.

The Enterprising Australian

Australian enterprise is undaunted by little difficulties such as moving a house. A Western Australia settler got sick and as he lived a mile and a half from his nearest friend, the latter thought he could be looked after better if he were nearer. But the settler refused to leave his house, so the friend made a "bee" and jacking up the house, they put it on a trap and moved it all to the friend's house.

Use of chromium-nickel alloys of steel is said to make the steam airplane possible.

A man's wife has to hunt his things for him, but a bachelor knows his are on the floor.

British Industries Fair 1932

To Be Held In London and Birmingham, England, 22nd February To 5th March

Already the largest national trade exhibition in the world, the British Industries Fair, or the "B.I.F." as it is becoming known in every language, is to be in 1932 still bigger and more representative of British industry than ever before.

This unique display of the manufactures of the home country and of the produce of the Empire countries will open in London and Birmingham on February 22, a date which is chosen because it is convenient for the principal buying season in a majority of the industries represented, and in order to attract the trade buyers from other continents who are in the habit of paying their annual business visit to Europe at that time of year.

In London, the principal development will be a new section filling a large part of the White City, Shepherds Bush, for the first combined display of the great textile industries of Great Britain and Northern Ireland.

Last February for the first time there was a new section at the White City for the products of the cotton textile industry, while the British Artificial Silk Exhibition became to all intents and purposes part of the Fair by being held during the first week of the Fair at the Royal Albert Hall.

These two exhibitions, the Cotton section organized by the Lancashire cotton trade organizations, and the Artificial Silk Show were such a success that meetings were called of representatives of these and other textile industries and it was unanimously decided to make a joint display in 1932.

The lighter industries other than textiles, will continue to be housed at Olympia where also the Empire Marketing Board will have its display of the products of the British Dominions and Colonies.

The heavier industries, once again, will have their display in the mammoth permanent Fair Buildings at Castle Bromwich, Birmingham, and there no less than in London, important developments are promised. One of the most important, involving still further extensions of the buildings, is a new section for cycles and motor cycles, their component parts, tires and other rubber equipment, and accessories of every kind. This section, which will be the first representative display in the Fair of the British cycle and motor cycle industry, is being organized by the Fair Board of Management in Birmingham in co-operation with the British Cycle and Motor Cycle Manufacturers' and Traders' Union who will have an information bureau in the section.

In many minor ways the overseas buyers will find the B.I.F. of 1932 more convenient and attractive than in previous years, and it is hoped for the first time to make arrangements for civic and other forms of hospitality which are likely to appeal to the business man from abroad whether from a British or a foreign country.

Admittance during business hours is by invitation only. Invitations can be obtained from The Office of H. M. Trade Commissioner, 703, Royal Bank Building, Winnipeg.

Six forges were kept busy all day during the annual horseshoe making contest at Banff, Scotland, recently.

Says Canada Stands On Threshold Of Another Era Of Expansion Such As Has Never Been Known

Canadian Wheat Wanted

Dr. W. W. Swanson Predicts Keen Demand In Near Future

"The billions of bushels of fictitious wheat supplies have faded away," Dr. W. W. Swanson, professor of economics at the University of Saskatchewan and advisor on wheat marketing problems to Premier R. B. Bennett at the last imperial conference, told an interviewer at Saskatoon.

Dr. Swanson reiterated the statement he made several months ago that the so-called surplus was not due to a wheat acreage too large for the world needs but mainly to the abnormal world crop of 1928. He regretted the small western crop this year as he predicts a keen demand, particularly for the higher grades of Canadian wheat to build up the low quality wheat of Europe.

Dr. Swanson looks for rapid disposal of the holdings of the U.S. farm board and regards neither Russia nor the Argentine Republic "as the formidable competitors that many have supposed."

Wrong Diet Ruins Teeth

Food More Important Than Tooth Brush Says Dental Scientist

It's the conviction of Dr. Perry R. Howe, president of dental science at Harvard University, that the diet is mightier than the toothbrush in keeping teeth sound.

The professor was awarded the Fauchard medal for his researches into the influence of diets on teeth at the convention of the American Dental Association here.

"Brushing teeth is to remove bacteria deposits," he said. "We've been brushing our teeth for 50 years and we still have cavities. Toothbrushes aren't the answer. Diet is."

He recommended more vegetables, fruits and milk in the average diet along with less meats and cereals.

Blind Led the Blind

Each Under the Impression other One Could See

Mrs. Margaret Wilson, comptometer operator, blind since birth, stood on a busy intersection waiting for someone to help her across the street.

A man stepped up and asked: "May I go across with you?" "I'd be glad if you would," replied Mrs. Wilson.

Safely across the street, the man thanked Mrs. Wilson.

"Why, I want to thank you," she said. "You know," the man continued, "when one has been blind as many years as I have it is a mighty big favor to have some one help him across the street."

Additional Census Bulletin

An additional census bulletin, covering several cities and towns in western Canada, has been issued. Population of Prince Albert is given as 9,886, as compared with 7,558 in 1921. The Pas, Manitoba, has had a gain of 2,157 to a total population of 4,015, an increase of 116.09 per cent.

Canada can lead the world into the era of expansion and prosperity which awaits it if Canadians will realize their duties and face them with confidence and optimism, Hon. H. H. Stevens, Minister of Trade and Commerce, told a gathering of business men at Brantford.

Endowed with tremendous resources, favorably situated among other nations, Canadians have every reason for believing that an upturn has been reached in their own and world conditions, he said. But they must realize that they share part of the responsibilities of a democratic institution resting upon their own, and not the government's shoulders, and keep to the middle course, which will mean a continuance of the freedom they have now.

With rising commodity prices, more favorable trade balances than have obtained for years, Canada stands on the threshold of "another Victorian era, another era of expansion such as the world has never known, an era in which two-thirds of humanity will learn to know and want the advantages which it has never felt before," he declared. And Canada, he added, is in the position of being in the vanguard of the nations which will benefit most, not lag behind weakly.

Shipping Cattle To China

Canada Has Received Order For One Hundred Head

Preparations are practically completed for an experimental shipment of Canadian dairy cattle to China, David Hunter, of Grimsby Beach, Ont., field man of the Canadian Ayrshire Breeders' Association, stated at Montreal.

Canada had received an order for 100 head of cattle for the Dairy Farm, Ice and Cold Storage Company of Hong Kong and the order was being filled with Ontario and Quebec Holsteins and Ayrshires, Mr. Hunter said. Some 14 Ayrshire cattle left Huntingdon, Quebec, November 13, and the Ontario quota of Holsteins left Dundas a few days later, he said.

The cattle were going to Hong Kong for breeding and dairy purposes, Mr. Hunter said. If the shipment was successful, it was hoped it would be instrumental in opening up the Japanese market also.

Bees Keep To Right

Exhibit In Museum At Washington Proves This Fact

A bee hive with its own cooling system and traffic laws is on exhibition under glass at the National Museum at Washington. A hive made of glass is connected with the outside world by a glass passageway. The worker bees travel through it in collecting nectar from flowers outside. They keep to the right in the passage, crawling speedily in the proper lanes. If the interior of the hive becomes too warm, say museum authorities, the bees will flap their wings rapidly to cool the air.

Boy Must Learn Languages

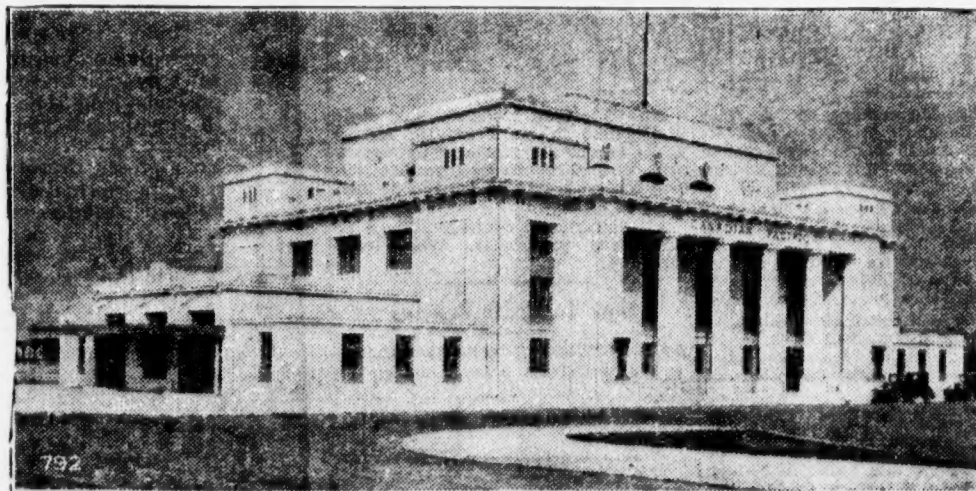

Commander Glen Kidston, the English motorist and airman, who was killed in an air crash, has left the bulk of his \$2,000,000 estate to his four-year-old son, Archie, on condition that the boy learn to speak and write French and German.

Extension and double-tracking of hundreds of miles of government railway lines have been started in Roumania.

"Mother, father is coming home drunk again." — Sondagisnise-Strix, Stockholm.

Montreal's Newest Station

A comprehensive view of the Canadian Pacific's new Park Avenue Station, located at the head of the thoroughfare of the same name, to serve the northern residential districts. This splendid building, completed at a cost of \$750,000, is constructed of limestone and is in combined modern and classical style. Park Avenue was opened for service November 1, 1931.

WORLD HAPPENINGS BRIEFLY TOLD

Pupils in Ontario may now pass through elementary and secondary schools on teachers' recommendation.

Seven hundred and fifty-nine poor Jewish children in Montreal received complete new winter outfits of clothing from a Young Hebrew society.

Vancouver has asked Premier Bennett to hold the proposed economic conference next summer in that city.

November 11, Armistice Day for other allied nations was celebrated in Italy as King Victor Emanuel's 62nd birthday.

France has signed an agreement to purchase 10 per cent. of her requirements of grain from Yugoslavia. The grain to be purchased in Yugoslavia amounts to 15,000 carloads.

Godfrey C. Dean, auto-gyro pilot, performed the daring feat of flying under the centre span of the Montreal Harbor bridge. Two weeks earlier he looped the loop in his autogyro.

When a gust of wind caught the navy blimp K-1, the world's largest non-rigid dirigible was completely wrecked as it was being housed in its hangar at Cape May, New Jersey.

Mexico may abandon her navy under an efficiency programme soon to be put into effect by the secretary of war. The present navy consists of a half dozen cruisers and some ancient gunboats.

Alberta liquor sales for the last fiscal year totalled \$4,678,109 compared with \$6,283,507 in the preceding fiscal year. The year's net profit was \$1,738,954 compared with \$2,410,886 in the preceding year.

Using a new form of railway ticket which entitled them, at a cost of \$2.50, to unlimited travel in North Wales, two travellers covered 1,100 miles, making the rate four and four-tenths miles for a cent.

Holding Semi-Annual Live Stock Survey

Dominion Bureau Of Statistics Announces Change In System

A new livestock survey is to be undertaken by the Dominion Government, particularly of breeding and marketing intentions, on December 1 of this year, it has been announced by the Dominion Bureau of Statistics. Since 1917, an annual survey has been made in June, in co-operation with the provincial governments, and in future years it is intended to continue a dual survey basis as at June and December 1, and thus secure a perspective of the livestock industry every six months.

In every province, except British Columbia, cards will be distributed to farmers through the rural schools. In British Columbia, the cards will be mailed direct to farmers for their attention. In certain areas of Alberta and Saskatchewan where rural schools are not organized, the livestock associations have co-operated in providing mailing lists so that the ranchers may be reached directly. The cards will be distributed during the latter half of November.

Upward Trend Of Trade

Advance In Wholesale Price Of Commodities Is Noted

A continued favorable trend in Canada is shown by government statistics states a report issued by the Department of Trade and Commerce.

Figures show, says the report, the first advance in the wholesale price index since August 1, 1929; increased output of hydro-electricity; a continued upward swing in industrial and public utility common stocks on Canadian markets and increased production of coal, petroleum and other minerals.

The report states the most favorable factor was the upswing in wholesale prices, recording advances in grain values and in iron and iron products, in electrolytic copper, lead, silver, tin and zinc.

The advance in prices of non-ferrous metals is calculated to benefit to a considerable extent mining in Canada of copper, silver, lead, tin and zinc.

An Earthquake a Day

Italy Has More Than Its Share Of Shocks

Earthquakes shiver up and down the Apennine razor backbone of Italy at the rate of more than one a day, or an average of 433 a year. Professor Palazzo, head of the weather bureau in Rome, who receives and classifies the 'quake reports, has come to the conclusion that earth-shocks prefer some months of the year and some hours of the day. July is the favorite month; then come August, September and January. Earthquakes choose to wreak their havoc at night rather than in the day. The favorite hours are between midnight and 4 o'clock in the morning.

Egg Production

Essentials To Success Which Must Be Observed

Officials of Iowa State College advise that in the management of hens kept for egg production the following essentials to success should be observed:

"Efficient and economical production practice demands an abundance of correctly balanced high quality feed and sanitary methods.

"When other influences are equal, the increase in income is directly proportionate to the increase in production per hen.

"Five important feed requirements are water, carbohydrates or fat for energy, protein for muscle repair, minerals for egg shell and bone repair and vitamins.

"A part of the ration must be ground feed or mash to provide a medium for the protein concentrate necessary to balance the ration.

"A mash rich in protein permits the use of a large proportion of whole grain.

"Sanitation in feeding practice is important.

"Provide plenty of hopper feeding space and other equipment to prevent crowding.

"Study the physical condition of the flock."

Gasoline Always Dangerous

A peculiar accident occurred to Annie Frazer, a servant in Aberdeen, Scotland. She had a hot iron in her hand when she went to speak to her mistress, who was cleaning a hat with gasoline. The heat from the iron ignited the gasoline, which set fire to the servant's clothing, severely burning her.

Fish meal makes an excellent food for cattle, swine and poultry.

SUNDAY SCHOOL LESSON

NOVEMBER 22

PAUL IN ROME

Golden Text: "I can do all things in Him that strengtheneth me." — Philippians 4.13.

Lesson: Acts 25.1-12; 28.16-31.
Devotional Reading: Isaiah 22-4.

Explanations and Comments

Rome At Last, verse 16. — While still in Ephesus Paul declared that after he had been to Jerusalem he must see Rome. Little did he realize that more than three years, packed with surprising happenings, would elapse before he reached Rome in chains. He "must see Rome." Just as the cohorts and representatives of the Roman government and the merchants of Roman trade went out to all the world along the far-extending network of Roman roads, so Paul expected the message of Christ and His triumphant reign to go out over those same roads to the last corner of the Roman world.

Rome was the great climax of Paul's work, and of Luke's history. In his eagerness which he shared with the apostle in achieving their long-desired goal, Luke inserts in his record a sort of double arrival. In verse fourteen he says, "So we came to Rome," and again in verse sixteen he adds, "And when we entered into Rome." Paul was shown much leniency during his stay in Rome. Possibly the good report of Festus and Agrippa concerning the prisoner they had sent them gave Paul an advantage, and without doubt Julius, the centurion whom Paul had helped on the voyage, interceded for him. Instead of being kept in the guardhouse of the Praetorian camp Paul was allowed to hire a house, or lodging, and live there by himself with the soldier who guarded him, and to whom he was chained. He often alludes to these chains in his letters, as he does to the prominent Jews of Rome who came to visit him, verse 20. See 2 Timothy 1.16; Colossians 4.3; Philemon 10; Ephesians 6.20.

There was a frequent change of soldiers, and thus Paul had an opportunity of spreading his message widely among the Praetorian guard. In Philippians 1.13, Paul says that his bonds had enabled him to preach Christ "throughout the whole Praetorian guard."

The chain on Paul's wrist was his chance to have a listener to his message, and he could write to the Philippians, "I would have you to know that the things which have happened to me have fallen out rather unto the progress of the gospel." Handicaps can be counted just handicaps, or capital on which to do the business in hand. It is a great art to make one's handicaps one's tools, the very instruments of one's success. Every one knows how Bunyan turned Bedford Jail into Pilgrim's Progress.

Might Start Contest

Western Fair Dates

Canadian and British Talent May Be Engaged To Supply Attractions

Western Canada Fair Association members, at a meeting in Saskatoon, decided that, as far as possible, Canadian or British artists would be engaged to supply attractions at summer fairs through western Canada in 1932.

While no decision as to attractions was arrived at, it is understood that several offers have been received from British bands and British vaudeville artists seeking engagements for next year. All managers and delegates attending the meeting expressed their desire that only Canadian or British Empire artists should appear on the program next summer.

A considerable part of the time of the meeting was taken up with the discussion of ways and means for adopting economies which would not impair the efficiency of the fairs.

Dates of summer fairs for next year were set: Brandon was allotted the week opening July 4; Calgary, July 11; Edmonton, July 18; Saskatoon, July 25; and Regina, August 1. Dates set for 1933 were: Brandon, opening July 3; Calgary, July 10; Edmonton, July 17; Saskatoon, July 24; and Regina, July 31.

Winter fair dates agreed on were: Brandon, starting March 14; Regina, March 21; Saskatoon and Calgary, March 28; and Edmonton, April 4.

Recommends Central Bank For Empire

Would Act As Clearing House For All Banks

A joint committee appointed by the Federation of British Industries and the Empire Economic Union, to examine the financial and currency policy of the empire, recommended the creation of a central bank to act as a clearing house for all banks of the British Empire.

The report further suggests summoning of an empire currency conference which might be able to establish a "pax-Britannica built up out of the present anarchy of the world's monetary affairs."

When people are asked to take a back seat they usually take affront.

FASHION

No. 629—Slenderizing Model. This style is designed in sizes 36, 38, 40, 42, 44, 46 and 48 inches bust measure. Size 36 requires 4½ yards of 39-inch material.

No. 615—For Classroom. This style is designed in sizes 6, 8, 10, 12 and 14 years. Size 8 requires 2¼ yards of 39-inch material for jacket and skirt with ¾ yard of 39-inch material for blouse and 1½ yards of 39-inch lining.

No. 900—Accentuates Slenderness. This style is designed in sizes 12, 14, 16, 18, 20 years, 36, 38 and 40 inches bust. Size 16 requires 2¼ yards of 39-inch material.

No. 527—It's Sportive! This style is designed in sizes 14, 16, 18, 20 years, 36 and 38 inches bust measure. Size 16 requires 2¼ yards of 39-inch material with ½ yard of 39-inch lining.

No. 493—Boudoir. (Flapper). Dolls dress, pantalets and hat. Cuts in one size only, and requires 3¾ yards of 39-inch material.

No. 605—Chic Model. This style is designed in sizes 14, 16, 18, 20 years, 36 and 38 inches bust measure. Size 16 requires 4¼ yards of 39-inch material with ½ yard of 35-inch contrasting.

LITTLE REAL PROGRESS MADE TO END WAR

Montreal, Que.—Armistice Day, 1931, 13 years after the war "which was to end war," found little real progress toward the goal of peace, General Sir Arthur Currie, Commander-in-Chief of the Canadian corps in France, declared in a speech on disarmament here.

Hope that had sustained the combatants during the dark days of the war, that their suffering would ensure that their children and their children's children would never have to undergo a similar horrible experience, had been shattered. "The prospects of permanent peace are no more assured today than they were in 1918," he stated.

"I am sure you will join me," Sir Arthur stated, "in praying that the next disarmament conference is a success, that it succeeds in bringing about an honest and universal reduction in the killing and wounding power of arms. It will do no good, in fact, it would have the opposite effect, if one nation disarms honestly and others do not. Disarmament must be honest, must be mutual, must be universal."

"Thirteen years have gone by and how great has been our disillusionment. It is true we have tried to do something which we hoped would prevent war. For ten years we have had the League of Nations, whose definite purpose is the promotion of peace and the settlement of international controversy by peaceful means."

"We have our Locarno and Washington pacts, we have the Kellogg-Briand treaty which registers the determination of more than 60 countries including the United States and Russia, to condemn recourse to war for solution of controversies and renounce it as an instrument of national policy," he went on.

"The history of the past has taught us, and the history of the present confirms most emphatically, that these solemn engagements are easily disregarded. Witness what is now happening in Manchuria between China and Japan. Whatever the irritation by China, and I have no doubt it has been great, Japan has broken her word and prostituted her pledge by her war-like actions in the last month. With inexcusable effrontery she has defied the League of Nations, which seems to be as powerless as it has been weak."

Sir Arthur felt a great mistake had been made by the League in inviting a representative of the United States of America to join the Council Board. That political move seemed to have loomed larger in the eyes of the League than the struggle itself, "or did they know that the League would fail and wish to have the United States of America associated with the failure?"

Ask Rate Revision

Application To Imperial Shipping Committee For Lower Marine Rates To Churchill

Ottawa, Ont.—Hon. R. J. Manion, Minister of Railways, has announced that the Canadian Government has made formal application to the Imperial Shipping Committee for a revision of marine insurance rates on the Hudson Bay route.

This committee announced the length of season and the rates last spring. The season was about six weeks in length and the rates considered high.

Since then a test movement of two shiploads of wheat has been carried out. Both ships made the trip to Churchill without delay or difficulty and complete data on their voyages are in the hands of the Imperial Shipping Committee. Upon the strength of this test movement a downward revision of insurance rates is being sought. The committee will have months to work on this reference before the 1932 season opens.

Memorial For Edison

West Orange, N.J.—Mrs. Thomas A. Edison, widow of the inventor, Wednesday, November 11, approved a plan for a \$10,000,000 world memorial to her late husband.

W. N. U. 1916

Economic Conference

Ottawa Pleased With Decision To Hold Parley In Canada

Ottawa, Ont.—Announcement by Prime Minister Ramsay MacDonald of the acceptance of the invitation of Rt. Hon. R. B. Bennett for the assembling in Ottawa of the postponed Imperial Economic Conference was heartily welcomed in the capital. While no official statement was made, it is understood that the governments of other parts of the empire are likewise sympathetic to the proposal of Premier Bennett.

About the middle of July or perhaps a week later is viewed as the probable date of assembling of the first conference of its nature to meet in the Canadian capital to discuss matters appertaining to the advancement of intra-empire trade. By that time, it is fully expected, New Zealand will have held its general elections and all parts of the Empire will be in a position to be represented through ministers of the crown, an obstacle in the case of New Zealand and Australia which caused the postponement, by mutual agreement of the Dominions, of the conference which had been called to meet in Ottawa on August 12 last. The Canadian Parliament, expected to convene in the latter part of January, will probably prorogue in ample time to afford the completion of arrangements for the conference here.

The date of the visit to Canada of Rt. Hon. J. H. Thomas, Secretary of State for Dominion Affairs, to discuss intra-empire trade matters preliminary to the Ottawa assembly, is not definitely known. Mr. Thomas is to visit other Dominions to continue his discussions. With Mr. Bennett leaving for a holiday, it is possible that Mr. Thomas may not come to Canada until the latter part of December or early next year.

Menace Of Armaments

The Very Root Of War, Says Sir Robert Borden

Ottawa, Ont.—The menace of armaments is the very root of war, and by war mankind has been martyred, said Sir Robert Borden, Canada's wartime Prime Minister in a Remembrance Day message here. More than ever the menace of armaments oppressed the world today he asserted.

"Can we estimate humanity's irreparable loss in the sacrifice of the generation that went forth to conflict nearly two decades ago?" he questioned. "In how great measure are present day burdens, destitution and distress due to the destruction and wastage of that conflict and of past wars?"

Sir Robert dealt with disarmament. He stated that the nations signatory to the League of Nations covenant gave therein their pledge that national armaments should be reduced to the lowest point consistent with national safety and the fulfilment of international obligations for common action.

"The actual work of the league began ten years ago," he said. "During at least seven years the ablest and most earnest minds have devoted their full energies and their most intensive effort to the fulfilment of this pledge. Substantial progress has been made, and, if world conditions permit, a disarmament conference of the world's nations will meet in February. It will be confronted with the almost insuperable task of committing each nation to substantial reduction of its armaments."

Foolish Economy

War Debts Blamed For World-Wide Depression

London, Eng.—High points touched by Prime Minister Ramsay MacDonald, speaking at the first business session of the new House of Commons.

A system of "crazy economy" in regard to war debts and reparations has brought about world-wide depression. "It is impossible to decree that without regard to circumstances certain blocks of gold shall be transferred from one nation to another without resulting in impoverishment of the nation which hands out the gold and ultimately of that which received it."

Premier Laval's visit to the United States should lead to an understanding between France and Germany. "In the full and final understanding, however, every nation involved must be a party to the agreement."

IN NATIONAL CABINET

Sir Herbert Samuel, Secretary of State for Home Affairs.

Planning Big Domestic Loan

Bonds Will Probably Be On Sale Very Shortly

Ottawa, Ont.—Good progress is being made in preparing plans for the domestic loan which will shortly be launched by the Dominion Government. While no official information has yet been given out, it will probably be a week before the sale of new bonds actually begins.

The rate of interest is said to have been fixed at five per cent, but further conferences will be held before the final decision is reached as to just what price the bonds will be offered to the public. The general impression is that the amount of the loan asked for will be \$125,000,000. The money is to be used for meeting requirements of unemployment relief and for various other purposes.

Shocks British House

Labour Member Derides Speech From the Throne

London, Eng.—Rt. Hon. George Lansbury, Parliamentary veteran and leader of the Labor Opposition, shocked the House of Commons by waving a copy of the King's speech opening Parliament and describing it as "this incongruous document, full of nothing from beginning to end."

His gesture came in the midst of a scathing attack on the new government for what he called its vague policies and upon the Prime Minister himself, for the part he played in forming the National Government.

More Work In Britain

London, Eng.—British unemployment on Nov. 2 totalled 2,710,944, a decrease of 15,148 in a week, it is announced. A steady decrease has been shown every week since the beginning of October.

British Parliament Opened

Facing Scene Of Splendor King Reads Speech From Throne

London, Eng.—In the great Chamber of the House of Lords, glowing with scarlet, gold and precious stones, the King officially opened Parliament on November 10.

The day began with showers of rain, but along the whole route from Buckingham Palace to Westminster great crowds lined the road cheering as His Majesty passed by. And, as the King, accompanied by the Queen, entered the Chamber of the House of Lords they faced a scene of splendor. Uniformed ambassadors were grouped on the right and the centre of the floor was so packed with peers that two former viceroys of India, Lord Irwin and Lord Reading, only with difficulty found seats. Along either side of the chamber the wives of the peers sat wearing royal ransoms in diamonds and other costly jewels.

There was a brief pause while the Gentleman of the Black Rod summoned the faithful members of the House of Commons to the Bar of the House of Lords. Then, in a clear voice, His Majesty read the Speech from the Throne. It contained a reference to receipt from the Canadian Government of an invitation to an Imperial Economic Conference at Ottawa, an invitation "which has been welcomed by my ministers and will be considered in a most sympathetic spirit and with earnest desire to come to some mutually advantageous arrangement with the governments of my Dominion."

Another Prominent Alberta Woman Dead

Mrs. O. C. Edwards Of Macleod, Succumbs To Pneumonia

Lethbridge, Alberta.—Mrs. O. C. Edwards, prominent in the National Council of Women, died November 10, of pneumonia at her home in Macleod, Alberta.

Mrs. Edwards was one of the five distinguished Alberta women who carried the appeal to the Privy Council which gave women the right to sit in the Canadian Senate.

She was a past vice-president of the National Council of Women, and convener of the legislative committee of the National Council. Mrs. Edwards was a recognized authority on laws for women and children.

Alberta Cattle Exports

Calgary, Alberta.—With approximately 6,000 head shipped from Alberta since the opening of the season in the spring, export of cattle to the Old Country has benefited Alberta ranchers to a great extent, according to J. J. Bowlen, M.P., for Calgary. In September 1,000 head were shipped, while total export from the Dominion was about 22,000 head.

LEAGUE TO DEAL WITH TROUBLE IN MANCHURIA

London, Eng.—Sir John Simon, new Foreign Secretary, is going to Paris for the League of Nations meeting concerning Manchuria, and it was announced that U.S. Ambassador Charles G. Dawes will observe the proceedings for the United States.

In London the opinion is that the issue will be brought down to earth at this session and some sort of definite plan for dealing with the situation in Manchuria may be evolved.

One way out, it is suggested here, would be for the League to appoint an international investigating commission whose work in the Far East would require several months during which the belligerents might cool off and the dispute might be settled by peaceful negotiations.

Failing this, an alternative would be an attempt to force Japanese obedience to the League's dictates, but no authoritative commentator would say he thought the League was likely to adopt such a course.

Geneva, Switzerland.—Japan has resumed the offensive in the Nonni Bridge area in Manchuria, China declared in an urgent communication to the League of Nations. The message said that Japan's troops had advanced their lines and were 20 kilometres on the road to Tsitsihar.

The Chinese were retreating, the communication continued, under bomb attacks and shell fire from the Japanese forces.

Two more notes from Dr. Alfred Sze, Chinese member of the League of Nations Council, charged that Japanese military authorities in Manchuria were working systematically to displace local Chinese authorities with groups under Japanese control.

Unable To Act

Sir John Simon New Deprived From Acting On Canadian Cases

London, Eng.—The acceptance by Sir John Simon of the foreign secretaryship in the National Government automatically deprived several important Canadian interests of his legal services, particularly in cases before the Privy Council.

It was intended he should lead for Quebec province in the radio control appeal, the hearing of which is expected to take place early in December, but it is now presumed some Canadian counsel will appear in his stead.

Landslide Buries Five

Men Preparing To Stop Work When Accident Occurred

Pierreville, Que.—Five men lost their lives when buried under a landslide near here. They were employed on excavation work on the shores of the St. Francis River in Nicolet country.

The accident occurred as the men were preparing to quit work in the 25-foot-deep hole in which they were digging. The excavation was completely filled by the landslide. Bodies of the victims were recovered seven hours after the men were trapped.

Named For University Post

St. Andrews, Scotland.—General the Rt. Hon. Jan Christian Smuts, South African statesman and scholar, and Lord Inchcape, British economist and industrialist, were selected as the candidates for the rectorship of St. Andrews University to succeed Sir Wilfred Grenfell, Labrador medical missionary, whose term of office has expired.

Canadian Wins Cup

New York, N.Y.—Canada took one challenge cup from the National Horse Show in the fourth day of the 46th "annual" at Madison Square Garden, when James Franceschini, of Toronto, won the Danum-Woodbine challenge trophy for heavy harness horses with his black gelding, "Saxon Ideal," which was perfectly driven to beat out a selected field of six entries.

An electric power company in Argentina is selling radio sets on time, the installments being added to the customer's monthly bills for electric current.

PROMINENT IN NEW BRITISH CABINET

Here are six of the new members of the British Cabinet announced by Premier MacDonald this week. Top, left to right: Sir John Simon (Liberal), Foreign Minister; Right Hon. Walter Runciman, President of the Board of Trade (Liberal); and Sir Philip Cunliffe-Lister (Conservative), Secretary for the Colonies. Bottom, left to right: Sir Henry Betterson (Labor), Minister of Labor; Right Hon. Neville Chamberlain (Conservative), Chancellor of the Exchequer; Lord Hailsham (Conservative), Secretary of State for War.

BOOST BOOZE AND BUST BUSINESS

This is the slogan on a gum sticker being sent out by the Alberta Prohibition Association over the signature

Here and There

Growing of ginseng for the Chinese market has developed into a substantial business at Watford, Ont., where about 45,000 pounds of this root were produced last year, valued at \$370,000.

Fine, unusually warm, weather has favored threshing operations in the north-west of Canada during October and has raised the grade of wheat substantially, according to the crop report of the Canadian Pacific's Agricultural Department.

Evaporators in the Annapolis Valley are now working full time and are consuming large quantities of low grade apples. Markets for the evaporated product are being found in Montreal and Toronto with an occasional car for the Canadian West.

The canoe continues to be popular. A recent official report shows that in the last five years in Canada building of canoes has increased by over 30 per cent. in the number of establishments making them and by 88 per cent. in the value of the output.

Canary Korndyke Alcetra is dead. This was the world-famous Holstein cow which in 1928 created a world record of approximately 1,080 pounds of butterfat in 305 days. She was later purchased by the Saskatchewan Government for \$10,000 for breeding purposes.

Due to fall of the Canadian dollar and rise in the French franc, there will be no reduction in the price of wines to Canadians this winter, according to L. B. Cordeau, Chairman of the Quebec Liquor Commission, interviewed aboard Canadian Pacific Empress of Britain on his return recently from a tour of Europe.

Visiting Canada for the purpose of studying all phases of the grocery trade, a party of British grocer apprentices are making a tour of the leading centres of Eastern Canada which includes Montreal, Ottawa, Toronto, Hamilton, London, Guelph, Welland and Niagara, travelling Canadian Pacific lines. They will return to England on S.S. Montclare.

Evangeline Memorial Museum at Grand Pre, N.S., repository of valuable Acadian and other historical relics of Nova Scotia has been accorded the distinction of inclusion in the directory of the Museum Association, Empire-wide organization, headed by Sir Henry Miers, noted authority, who visited Canada this summer.

Captain A. J. Hailey, R.N.R., veteran commander of the Canadian Pacific liner Empress of Canada has been decorated with the Royal Order of Siam by His Majesty King Prajadhipok after conveying the Royal party and suite from Victoria to Hong Kong. Captain Samuel Robinson, of the Empress of Japan was similarly honored when he brought the Royal party to Canada.

Co-operation between Canada's two great railway companies registered an important advance recently when it was officially announced that an agreement had been reached whereby the Canadian National will co-operate with the Canadian Pacific Railway and the Canadian Pacific Steamships in the solicitation of freight, passenger and express traffic for Canadian Pacific ships to and from Canadian Atlantic ports. (791)

of H. H. Hull, an ex-printer.

The slogan is very splendid but we would like to suggest to Mr. Hull that he would have helped Alberta business to some extent by having the gum stickers printed in Alberta and not in the U.S.A.

Collect money from Alberta citizens; ask Alberta printers for free publicity; send the money collected to U.S.A. to purchase gum stickers! This is certainly not our idea of the way to help business in Alberta, at least, not the printing business.—Innisfail Province.

GOSSIPS SHOULD CHANGE WAYS

The biggest nuisance and the most hateful personage in the community is the "gossip." The thief, who comes in the night to steal nothing more than property is not to be dreaded as much as the gossip, who through false or other means, endeavors to steal your self-respect. What is more, his deceitfulness is not even a hidden affair for it is unconsciously revealed to the listener.

The gossip is not necessarily a bad character but a good one gone wrong. Dwelling upon other's short-comings so saturates the gossip's mind and words that it is even pleasurable to him—or her, mind you—gleaning the thorns and thistles instead of the golden wheat from the field of life.

The thorns are no doubt sharp and pointed but the striking "point" is that they pierce most deeply the very person who picks them. Of course in the handling the seeds will spread and find rather good conditions for growth in innocent hearts.

And now from the list of gossips, do your uttermost to remove your name. Never again speak those unkind about others be noble enough to remain "mum" on the subject.—Wetas-kinin Times.

"S. P. C. E."

We are seriously contemplating the organization to be known as "The Society for the prevention of Cruelty to Editors," the objects of this society will be to regulate the demands made on the various chiefs of the clan, particularly those who sit in small town newspaper offices.

Every week deputations wait on the town editor asking for advance publicity for some enterprise that may or may not be of a community nature. It is generally assumed that the event is of supreme importance and the biggest news story of the week. Following this deputation, a lone individual comes along and assumes that the man who has already spent thirty minutes writing up some ballyhoo, will purchase at least two reserved seats so that he can attend the show with a companion.

Naturally it is assumed that the editor will write not less than one column on the performance in which glowing phrases will pronounce it as being the

outstanding event in the history of the town and in which due credit will be given to all concerned—except the guy who wrote the story, who usually remains anonymous.

And, of course, everyone thinks the scribe is tickled up the back, that he just had one round of pleasure, taking in the concerts, meetings, movie shows, services, whist drives, dances and the other nocturnal splendors. Why should he not pay for the entertainment?

We are taking the chance of being called stingy, mean, tight-fisted, selfish, ornery good-for-nothing, with no community spirit, when we say that our attendance at such festivals, concerts, meetings, church socials, sports and other local activities is work—and we don't usually pay to go to work.—Armstrong, B.C. Advertiser.

Wheat Prices Rise

The rise in prices of wheat is due to a series of factors, notably the diminished volume of supplies from Russia and the poor grade of wheat coming from that country; reduced plantings and drouth conditions in the United States' winter wheat area; the poor quality of the European crop which has been damaged principally by rain; and the reduced world production of wheat and rye from last year's total.

The above set of factors have induced speculators to enter the market and somewhat of a sensational rise followed. There is some danger that the market may be carried too high in too short a time. From the present outlook indications are that there will be a steady demand for wheat during the year, but it should also be remembered that there are supplies available notably in the United States and Canada and that the Australian and Argentine crops have not suffered to any extent as yet.

Russia undoubtedly has a considerable quantity of grain produced from this year's crop but much of it is of low quality. Furthermore it is indicated that the Russian transportation system has not been able to handle the grain expeditiously.

U. S. Wheat Stored in Canada

Over 32,000,000 bushels of United States' wheat is stored in Eastern Canadian terminal elevators. Normally the amount at this time of year is around five million bushels.

French Wheat Requirements

It is anticipated that France will require to import from 50,000,000 to 60,000,000 bushels of foreign wheat this year.

Remember! When the next printing salesman walks into your office and asks you for a printing order, tell him that there is a printer in town and that he CAN do that particular job.

THE HOUSE OF DREAMS-COME-TRUE

— BY —
MARGARET PEDLER

Author of
"The Splendid Folly," "The Hermit
Of Far End,"
Hodder & Stoughton, Ltd., London.

CHAPTER VI.—Continued.

"You are wonderful—you English! If it had been I who had experienced your adventure today, I should be fit for nothing. As to dancing the same evening—'ma foi, non! Voyons,' I shall leave you to rest a little."

She nodded smilingly and left the room. Once in the corridor outside, however, the smile vanished as though it had been wiped off her face by an unseen hand. Her curving lips settled into a hard, inflexible line, and the soft, disarming dark eyes grew suddenly sombre and brooding.

She passed swiftly along to her own suit. It was empty. The little Count was downstairs, agreeably occupied in comparing symptoms with a fellow health crank he discovered.

With a quick sigh of relief at his absence she flung herself into a chair and lit a cigarette, smoking rapidly and exhaling the smoke in quick nervous jerks. The long, pliant fingers which held the cigarette were not quite steady.

"Tout va bien!" she muttered restlessly. "All goes well! Assurance, his punishment will come." She bent her head. "Que Dieu le veuille!" she whispered passionately.

Jean took a final and not altogether displeased survey of herself in the mirror before descending to the big "salle" where the fancy-dress ball was to be held. She had had her dinner served to her in her room so that she might rest the longer, and now, as there came wafted to her ears the preliminary grunts and squeals and snatches of melody of the hotel orchestra in process of tuning up, she

Too Much ACID

MANY people, two hours after eating, suffer indigestion—as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. 50c a bottle—any drug store.

The ideal dentifrice for clean teeth and healthy gums is Phillips' Dental Magnesia tooth-paste.

W. N. U. 1916

was conscious of a pleasant glow of anticipation.

There was nothing strikingly original about the conception of her costume. It represented "Autumn," and had been designed for a fancy-dress ball for more than a year ago—before the death of Jacqueline had suddenly shuttered down all gaiety and mirth at Biernfels. But, simple as it was, it had been carried out by an artist in colour, and the filmy diaphanous layers of brown and orange and scarlet, one over the other, zoned with a girdle of autumn-tinted leaves, served to emphasize the russet of beech-leaf hair and the topaz-gold of hazel eyes.

Madame de Varigny's glance swept the girl with approval as they entered the great "salle" together.

"But it is charming, your costume! Regarde, Henri!"—turning to the Count, who, as a swashbuckling d'Artagnan, was getting into difficulties with his sword. "Has it not distinction—this costume d'automne?"

The Count retrieved himself and, hitching his sword once more into position, poured forth an unembarrassed stream of Gallic compliment.

Madame de Varigny herself was looking supremely handsome as Cleopatra. Jean reflected that her eyes, slumbrous and profound, with their dusky frame of lashes and that strange implacability she always sensed in them—might very well have been the eyes of the Egyptian queen herself.

The "salle" was filling up rapidly. Jean, who did not anticipate dancing overmuch, as she had made but few acquaintances in the hotel, watched the colorful, shifting scene with interest. There was the usual miscellany of a masquerade—Pierrots jostling against Kings and Cossacks, Marie Antoinettes flaunting their jewels before the eyes of demure-faced nuns, with here and there an occasional costume of outstanding originality or merit of design. Contrary to her expectations, however, Jean soon found herself with more partners than she had dances to bestow, and, newly emancipated from the rigour of her year's mourning, she threw herself into the enjoyment of the moment with all the long repressed enthusiasm of her youth.

It was nearing the small hours when at last she found herself alone for a few moments. In the exhilaration of rapid movement she had completely forgotten the earlier fatigues of the day, but now she was beginning to feel conscious of the strain which the morning's skating, followed by that long, exhausting struggle through the blizzard, had imposed upon even young bones and muscles. Close at hand was a deserted alcove, curtained off from the remainder of the "salle," and here Jean found temporary sanctuary, subsiding thankfully on to a big cushioned divan.

The sound of the orchestra came to her ears pleasantly dulled by the heavy folds of the screening curtain. Vaguely she could feel the rhythmic pulsing, the sense of movement, in the "salle" beyond. It was all very soothing and reposeful, and she leaned her head against a fat, pink satin cushion and dozed, at the back of her mind the faintly disturbing thought that she was cutting a Roman senator's dance.

Presently she stirred a little, hazily aware of some disquiet that was pushing itself into her consciousness. The discomfort grew, crystallizing at last into the feeling that she was no longer alone. For a moment, physically unwilling to be disturbed, she tried to disregard it, but it persisted, and, as though to strengthen it, the recollection of the defrauded senator came back to her with increased insistence.

Broad awake at last, she opened her eyes. Someone—the senator presumably—was standing at the entrance to the little alcove, and she rushed into conscience-stricken speech.

"Oh, have I cut your dance? I'm so sorry—"

She broke off abruptly, realizing as she spoke that the intruder was not, after all, the senator come to claim his dance, but a stranger wearing a black mask and domino. She was sure she had not seen him before amongst the dancers in the "salle," and for a moment she stared at him—bewildered and even a little frightened. Vague stories she had heard of a "hold-up" by masked men at some fancy-dress ball recalled themselves disagreeably to her memory, and her pulse quickened its beat perceptibly.

Then, quite suddenly, she knew who it was. It did not need even the evidence of that lock of "poudri" hair

AS SHE LOST FAT SHE LOST PAIN

Like many others, this woman found that excess fat did not come alone. In her case it brought sciatica with it. She did not know that both troubles were due to a common cause—but she found they both gave way before one common remedy.

"I have been a martyr to sciatica and kidney trouble for years. I took Kruschen for about a month, when people began telling me how well I looked. I have lost fat that was no good to me, and now, after three months of Kruschen, I only go 168 lbs. instead of 185 lbs. I'm not going to say my pains have all gone, but I do say I'm wonderfully well, and hope to improve yet. I bless the day I started Kruschen."—Mrs. F. L. P.

The six salts in Kruschen assist the internal organs to throw off each day the wastage and poisons that encumber the system. Then, little by little, that ugly fat goes—slowly, yes—but surely. The pains of sciatica and rheumatism cease. You feel wonderfully healthy, youthful, and energetic—more so than ever before in your life!

above the mask he wore, just visible in the dim light of the recess, to tell her. She knew. And with the knowledge came a sudden, disturbing sense of shy tumult.

She half-rose from the divan.

"You?" she stammered nervously. "Is it you?"

He whipped off his mask.

"Who else? Did this deceive you?"

—dangling the strip of velvet from his finger, and regarding her with quizzical grey eyes. "I've been hunting for you everywhere. I'd almost made up my mind that you had gone to bed like a good little girl. And then my patron saint—or was it the special devil told off to look after me, I wonder?—prompted me to look in here. 'Et vous voilà, mademoiselle!' How are you feeling after your exploits in the snow?"

He spoke very rapidly, in a light half-mocking tone that seemed to Jean to make the happenings of the afternoon unreal and remote. His eyes were very bright, almost defiant in their expression—holding a suggestion of recklessness, as though he were embarked upon something of which his inmost self refused to approve but which he was nevertheless determined to carry through.

"So you did 'call to enquire,' after all!"

As she spoke, Jean's mouth curled up at the corners in an involuntary little smile of amused recollection.

"So I did call after all?" He looked puzzled—not unnaturally, since he had no clue to her thoughts. "What do you mean? I came"—he went on lightly—"because I wanted the rest of the day which you promised to share with me. The proceedings were cut short rather abruptly this afternoon."

"But how did you get here?" she asked. "And—and why did you disappear so suddenly after we got back to the hotel this afternoon?"

"I got here by the aid of a pair of excellent skis and the light of the moon; the snow ceased some hours ago and the surface is hardening nicely. I disappeared because, as I told you, if you gave me this one day, it should bind you to nothing—not even to introducing me to your friends." "I should have had to present you as Monsieur l'Inconnu," remarked Jean without thinking.

"Yes." He met her glance with smiling eyes, but he did not volunteer his name.

He had made no comment, uttered no word beyond the bald affirmative, yet somehow Jean felt as though she had committed an indiscretion and he had snubbed her for it. The blood rushed into her cheeks, staining them scarlet.

"I beg your pardon," she said stiffly.

Again that glint of ironical amusement in his eyes.

"For what, mademoiselle?"

She was conscious of a rising indignation at his attitude. She could not understand it; he seemed to have

Try Lydia E. Pinkham's Vegetable Compound

completely changed from the man of a few hours ago. Then he had proved himself so good a comrade, been so entirely delightful in his thought and care of her, whereas now he appeared bent on wilfully misunderstanding her, putting her in a false position just for his own amusement.
(To Be Continued).

Carry On Business

Century and Half

Firm in London Makes Wonderfully Natural Artificial Eyes

There is in London, a firm in which eye making has been carried on by the same family for over 150 years. Artificial eyes made by this firm are so wonderful in their naturalness that even in a photograph no difference can be detected. It is possible even to make the pupil enlarge and contract. Business is done with Africa and with Eastern countries in the manufacture of eyes for idols. The eyes of a temple god must, of course, be of a very special kind. The fierce, war-like gods need piercing, flashing eyes, whilst those of the gentler kind require eyes that are liquid pools of sympathy.

THE RHYMING OPTIMIST

By Aline Michaels

YEAR'S ENDING

Now that the year turns towards its ending,

Bloom-time and seed-time through,
With gold and scarlet leaves descend-

ing,
Let me drift, too.

Let me forget too much of longing,
Too many plans and hopes,
For bright are hosts of beauty throng-

ing
Autumnal slopes.

Behind I leave the city's clamor
To dwindle to a sigh,
As down strange paths of dream and

glamour,
The year goes by.

I would forget the care and travail,
The haste of anxious ways,
No tangled skeins would I unravel.

In these calm days.

Gone now desires beyond attaining.
Sweet, sweet, this joy life gives,
This beauty, through the year is wan-

ing,
That throbs and lives!

Persian Balm appeals instantly to the dainty woman. Stimulating the skin, making it velvety soft in texture, it creates and preserves complexions of exquisite charm. Delicately fragrant. Cool and delightful to use. Especially recommended to soothe and dispel roughness or chafing. Stimulating and invigorating. Imparts a youthful loveliness and protects and enhances the most delicately-textured skin. Persian Balm is the unrivalled toilet requisite.

Manitoba Gold Production

Five Times Greater This Year Than In Previous Year

Production of gold in Manitoba during the current year is estimated at five times greater than the amount produced in previous years, according to Hon. G. D. McKenzie, Manitoba Minister of Lands, Forests and Mines.

He said there was considerable prospecting for gold around The Pas, but not for the base metals. "Many interesting finds are being reported, and it is expected two more mines will be opened next spring," he added.

Why suffer needlessly! Douglas' Egyptian Liniment brings quick, sure relief to scald feet, soft corns and warts. Relieves inflammation. Removes proud flesh.

Old-Age Pensions

"A letter has been sent out to all the provinces to the effect that it is the opinion of the Federal Government that new agreements on old-age pensions must be negotiated with each province and the Department of Justice has been asked to draft a standard form of agreement," said Hon. G. D. Robertson, Minister of Labor.

Remains To Be Seen

A mysterious envelope securely sealed in several places was given to the authorities of Salts Hospital at Shipley, Yorkshire, England, to be opened and the contents sold in 1961. The donor, Abraham Kendall, thinks that the undescribed contents will then have become valuable.

ACTS TWO WAYS AT ONCE

Little Helps For This Week

"Be kindly affectioned one to another with brotherly love."—Romans xii. 10.

To bless mankind with tithes of flowing wealth,
With rank to grace them, or to crown with health,
Our little lot denies; yet liberal still,
God gives its counterpoise to every ill;

Nor let us murmur at our stunted powers
When kindness, love, and concord may be ours.

The gift of ministr'ing to others' ease,
To all her sons impartial Heaven decrees;

The gentle offices of patient love,
Beyond all flattery and all praise above;

The mild forbearance at a brother's fault.

The angry word suppressed, the taunting thought.

—Hannah More.

Would we only endeavour to take God's view of those among whom we dwell, and among whom our daily intercourse lies, how gentle, how patient, how earnest in all good works and kind offices, how averse from everything that could give offence should we be.

—Andrew P. Peabody.

As a vermicide an excellent preparation is Mother Graves' Worm Exterminator. It has saved the lives of countless children.

Saskatchewan Grain Acreage

Ten Year Period Shows Increase Of Over Four Million Acres

An increase of 4,078,187 acres sown to the principal crops for the Province of Saskatchewan in the 10-year period between 1921 and 1931 is shown in the preliminary statement issued by the Dominion Bureau of Statistics. This year's acreage was 21,746,039 against 17,668,852 10 years ago. The largest increase was in wheat, which rose from 11,684,292 to 14,775,047.

Acreage sown to oats declined from 4,860,202 to 4,368,735, a drop of slightly over 10 per cent.

RESTFUL SLEEP for FRETFUL, FEVERISH CHILD

—With Castoria's regulation

When your child tosses and cries out in his sleep, it means he is not comfortable. Very often the trouble is that poisonous waste matter is not being carried off as it should be. Bowels need help—mild, gentle help—but effective. Just the kind Castoria gives. Castoria is a pure vegetable preparation made specially for children's ailments. It contains no harsh, harmful drugs, no narcotics. Don't let your child's rest—and your own—be interrupted. A prompt dose of Castoria will urge stubborn little bowels to act. Then relaxed comfort and restful sleep! Genuine Castoria always has the name:

were among the visitors to Drumheller
this week to taking in some of the
court cases at the fall assizes.The C.G.I.T. Girls will hold a tea
in the Farmers' Exchange hall on Sa-
turday, November 21st, from 3 to 6
p.m. Everybody welcome. 1cRev. Canon Gale, L. Th., was a
visitor to Carbon Wednesday, when he
conducted the final class for Confir-
mation in Christ Church.The Builders' Hardware Store at
Carbon is putting on their Annual
sale, commencing on Saturday of this
week, and lasting for two weeks. The
management has announced that every-
thing in the store will be reduced in
price, many lines being marked below
cost to clear. Anyone wanting hard-
ware can procure it at the Builders'
Hardware Store for the next two
weeks at Bargain prices. Stock up
on useful articles while you have the
chance. 1tcOur stock of Personal Greeting Cards
has arrived. Call in and make your
selection early. Our supply is limited
and the price does not run over \$1.75
per dozen for your cards, printed neat-
ly with your name and address. We
do not handle cards in any other way,
and we do our own printing, thus keep-
ing all the money at home. Support
home industry.Rev. Wm. McNichol, E.J. Rouleau
and L. Poxon spent Wednesday last
duck hunting at Elnora. They report
birds plentiful with only fair luck.**THE

W. A. BRAISHER**Have You Paid Your
Subscription Yet?****Stay With the Wheat Pool**In commenting on the delivery of wheat to Pool elevators in
the prairie provinces, The Northwestern Miller, never very friendly
to the Pool movement, says: "There is reason to believe that all
thre Pools have up to the present enjoyed their usual quota of
grain handlings in the country. Such conditions in a year of short
crops and keen country buying bespeaks the loyalty of the western
farmer to the organization he has built up."The solidarity of purpose manifested by the grain growers
of the west wrings grudging praise even from opponents. Do not let
up for a minute.

See that All Your Grain goes to Alberta Pool elevators.

You can pool your wheat or sell for cash at current market
prices.**Alberta Wheat Pool**
